

11000 Series (Lacquered Edge) Deluxe Plywood Core Folding Tables

A GOOD BUY AT ANY PRICE

TOPS:

High pressure laminate on 3/4" plywood core with backer sheet and 29" high. Edges bullnosed sealed and hot lacquer finished. Available in WA-Walnut, OK-Light Oak, TK-Teak, FM-Fusion Maple, and IO-Gray Nebula.

FOLDING MECHANISM:

11-gauge steel with reliable gravity-type locking ring.

LEGS:

Supportive 29" high x 1" diameter 16-gauge steel tubing with Black painted finish.
(Note: Gray Nebula tops have gray molding and legs.)

Low range (LR) - 18.5" to 28.25"

Allied Budget Science Table

The only thing budget about this science table is the price

TOPS:

Standard with 1-1/8" solid resonized core 45 lb. density particleboard and chemical resistant high pressure laminate surface. Features include no-snag, wall saving, high impact black vinyl bumper molding and safety rounded corners. Gator Ply backer sheet adds moisture resistance.

APRONS:

3" wide, double flange, heavy 16 gauge steel channel. The apron offers superior strength and adds a finer furniture look to this table.

LEGS:

Black enameled square 1-1/4" heavy 16 gauge steel tubing.

GLIDES:

Four adjustable 1-1/4" diameter glides for easy, safe leveling.

Allied

The Table Company

Science/Biology Tables

We've made a science out of building superior-quality tables

BS500 Series Science/Biology Tables

We've made a science out of building superior-quality tables

Aprons and Legs

Solid hardwood aprons on all Allied science tables are $\frac{3}{4}$ " x 5". Solid hardwood legs are 2- $\frac{1}{4}$ " square. All solid hardwood surfaces are coated with a tough, environmentally friendly water-based non-toxic clear lacquer. Each leg is factory fitted with a black vinyl boot to protect the legs from damage or abuse.

Top to Frame Attachment System

Factory installation of the work-surfaces to the frames is a hallmark for all Allied science tables so that proper alignment and consistently strong and secure bonds are assured.

Leg Attachment System

Each Allied science/bio leg is secured to the apron frame with two (2) $\frac{5}{16}$ " diameter steel hanger bolts offering the utmost in strength and wobble-free durability. Bolts extend through heavy gauge steel corner brackets for the ultimate in security. Not all manufacturers use two bolts per leg, resulting in less than satisfactory performance in the classroom.

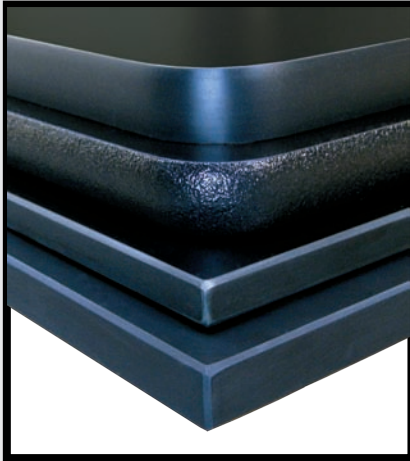

BS2454EP - Epoxy Top

BS2454PH - Phenolic Top

Top Choices

Chemsurf™ - 1-1/8" thick particleboard with Chemsurf™ high-pressure chemical resistant laminate that offers moderate chemical resistance yet meets the needs of most school science labs. Surrounded by premium quality black vinyl T-molding for edge protection and backed with a phenolic backer sheet to prevent moisture intrusion.

EnduraEdge™ - extremely durable, specially formulated polyurethane/polyurea coated edge system which completely seals the table edge against liquid, chemical or bacterial intrusion. Chemsurf™ high-pressure laminate top surface and phenolic backer sheet.

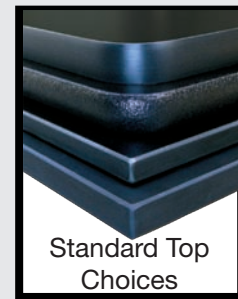

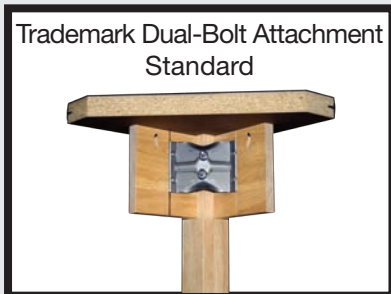

Solid Phenolic Resin- 3/4" thick solid phenolic resin top offering superior chemical resistance in a homogeneous material that stands up well to most caustic chemicals used in advanced science labs and classrooms.

Solid Epoxy Resin - 1" thick solid epoxy resin material is the ultimate in chemical resistance for the most demanding science labs and classrooms. Being impervious to all chemicals and liquids, it is used in professional labs and higher education classrooms.

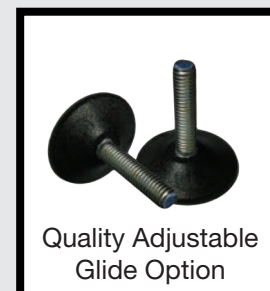

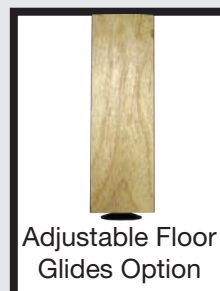

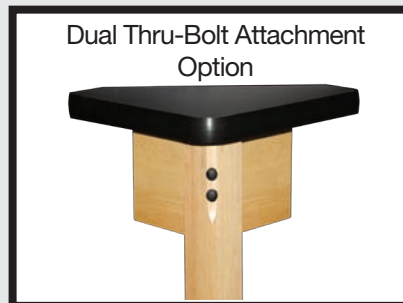

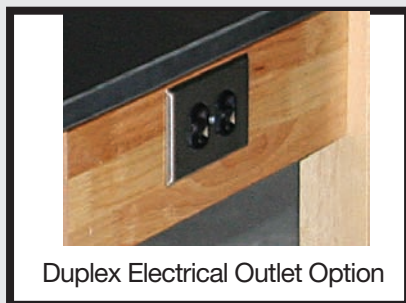

Black High-Pressure Laminate - the look of a science table with limited chemical resistance

UF Series **Science/Biology Tables**

Welded steel frame science tables for the utmost in strength and durability

When it comes to building science tables that are made to last for years of heavy use, the Allied welded frame UF science tables are designed to never fail and look great for years. Constructed of heavy 16 gauge, 1-1/4" square steel tubing, with fully welded corners and coated in the finest chip and scratch resistant powder coatings, these tables offer exceptional value.

To meet the needs of virtually any classroom size and layout, a variety of top materials is available, and they can be manufactured to your exact specifications. The UF Series tables come in both adjustable and fixed height versions. Standard adjustable glides allow for easy leveling on any floor.

Modern science tops come in a myriad of colors. Wilsonart™ Chemsurf™ high-pressure laminate is available in many colors and patterns, so you may even be able to color coordinate your science tables with your casework for a true designer look. Also, the latest solid material manufacturing technology allows for solid epoxy resin color selections that can bring your science classroom into the 21st century.

Allied Budget Series Science Tables

The only thing budget about this science table is the price

When the look of hardwood is not required for your science or biology room, the high-strength steel Allied 8000 Series is an attractive, functional and cost effective alternative. Steel aprons and legs guarantee years of reliable service.

These frames can be ordered in a wide variety of sizes, and with two of our most popular top materials.

80-PH - $\frac{3}{4}$ " thick solid phenolic resin - superior chemical resistance.

80-BA - Chemsurf™ high-pressure laminate - moderate chemical resistance.

Whether you prefer fixed height legs or the adjustable height option, your Allied Budget Science Tables will be the perfect fit for your lab furniture needs and limited resources.

8000 Series with adjustable height option

Standards & Options

Aprons

Three-inch wide double flange, heavy gauge steel channel aprons. Corner connection is accomplished using extra heavy gauge steel corner brackets that also serve to secure the table legs using our trademark dual-bolt attachment system.

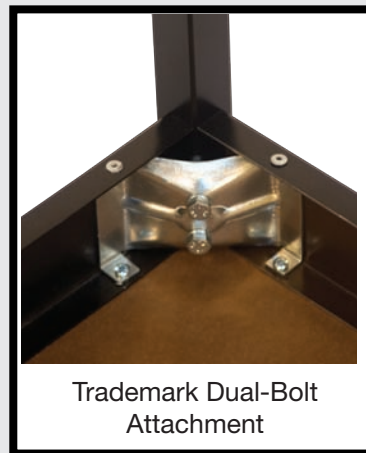

Legs

Black square tubular 1- $\frac{1}{4}$ " heavy-duty 16 gauge steel. Standard table height is 29- $\frac{1}{2}$ ". Table heights up to 35- $\frac{3}{4}$ " utilizing our adjustable leg configuration are optionally available.

STL Series

Solid Hardwood Stools

Superior Quality - Durable and Eco-Friendly

Allied solid parawood stools are constructed of the most eco-friendly, sustainable hardwood used in furniture construction. Parawood is in the same family of hardwoods as maple, yet because it grows much more quickly, and farmers must be constantly planting new trees to replace those that are harvested, it is considered a renewable resource that helps the environment in many ways. The 14" footprint on all stools provides exceptional stability, and our exclusive full-perimeter under-seat support means the stool will stand up to everyday use in any setting.

Superior Fully-Framed Seat Support

BS2454EP - Epoxy Top

All stool seat, leg and horizontal support components have smooth, rounded edges for greater comfort and a finer furniture look and feel.

Allied takes pride in manufacturing everything we sell at our facility in Jacksonville, Florida. This special capability allows us to offer you custom designed and built solutions for your unique classroom and lab situations. Our science tables and tops can be made in virtually any size and shape, with work-surface colors to match any room decor. When combined with our most sought after design and functionality characteristics, Allied tables are never a 'one-size-fits-all' choice.

P.O. Box 3125, Jacksonville, Florida 32206 / Phone (904)359-0386 / www.alliedplasticsco.com

Allied Plastics Co. Inc., headquartered in Jacksonville, Florida, manufactures tables, table tops and table legs for the school, office and food service industries. Since 1945, Allied has served these industries by providing a wide range of top-of-the-line, custom-crafted tables backed by superior customer service and on-time delivery. Today, we sell our products through a diverse, non-exclusive network of distributors throughout the United States and internationally. Allied's custom orders and ready-to-ship inventory include a full range of school activity tables (pre-K through adult) as well as library tables, science tables, art tables, folding tables, computer tables and workstations, food service tables, conference tables and training tables. And with Allied's full 30-year warranty* on all products, you can be sure that Allied is the clear choice for your school, office and food service table needs.

Renewable Parawood Plantation

What is parawood? Allied is proud to exclusively use parawood, the most ecologically friendly and sustainable resource lumber used in today's furniture industry in all of its solid hardwood science tables. This hardwood (Hevea Brasiliensis) is a renewable resource that is grown on plantations employing a managed system that insures appropriate utilization both in the initial latex production cycle of the trees as well as the harvesting at maturity for hardwood production. This method ensures that the resource is used in all stages of its life cycle. Unlike other hardwoods like oak and maple that are cut down for the sole purpose of producing furniture, parawood is used only after it completes its latex producing cycle and dies. This managed approach has yielded a continuous supply of timber from plantations whose forestry programs date back to the 1800's. Allied remains an industry leader in natural resource preservation, since no old growth or tropical forests are being sacrificed for our furniture production.

What it means to be GreenSafeCertified™

Focusing on being green is a way of life. As individuals, we can all strive to use fewer and more sustainable resources, to use those resources efficiently, and to have as minimal a negative impact as we possibly can in our everyday lives. As a company, we can support the planet by concentrating on the same goals.

Being a responsible manufacturer starts with the materials employed. Every product displaying the GreenSafeCertified™ emblem has been manufactured in an environmentally responsible manner of materials that have been independently certified as safe and healthy. To learn more about how Allied is protecting you and your children, see the complete GreenSafeCertified story at: <http://www.greensafecertified.com>

Allied Plastics Co., Inc. warrants for a period of 30 years* to the original purchaser that every Allied product is free from defects in workmanship and material under normal use and service. All moving parts to include but not limited to glides, casters, hinges and revolving platforms, etc. are warranted for 5 years against defects in workmanship or manufacture under normal use and service. Allied's obligation under this warranty is limited to the replacement or repair, at Allied's option, completely without charge for material or labor, of any part found defective by Allied. Shipping charges remain the responsibility of the purchaser.

This warranty is in lieu of all other warranties expressed or implied, and any representations or promises inconsistent with or in addition to this warranty are unauthorized and shall not be binding upon Allied. In no event shall Allied be liable for any special or consequential damages, whether foreseeable or not.

This warranty shall be void if the product has been subjected to misuse or has been damaged by negligence or accident, or if it has been repaired or altered by other than authorized agents of Allied. *Hardwood Stools carry a 5 Year Warranty.

BS500 Series Science/Biology Tables

We've made a science out of building superior-quality tables

TOPS:

Standard with 1 1/4" solid resinized core and chemical resistant high pressure black formica laminate (suffix "BA"). Features include no-snap, wall-saving, high-impact black vinyl bumper molding

Also available in other popular solid top materials:

Solid 1" thick chemical resistant Epoxy Resin (suffix "EP")

Solid 3/4" thick chemical resistant Phenolic – New, superior high tech replacement for epoxy coated welded fiber. This material will not chip, crack, or peel (suffix "PH")

APRONS:

Constructed of 3/4" x 5" wide hardwood, factory assembled to table.

LEGS:

2-1/4" square solid hardwood which attaches sturdily into heavy steel corner brackets on apron with two heavy-duty hanger bolts. **Floor-protecting black vinyl boots are standard.**

SHAPES AND SIZES:

Features

Quickmount:

The quickmount bracket is attached at the factory to facilitate easy leg mounting at point of use. Simply insert the top plate into the bracket; it secures with only a single screw.

Options

Legs:

Adjustable Height Legs: Positive locking and tamper proof, the adjustment mechanism is a simple set screw that inserts into predrilled holes at one inch intervals.

Standard adjustment: 21" - 29"

Low range adjustment: 15" - 24"

The tapered steel tube insert telescopes within the top mount which is welded to a triangular top plate for maximum stability. A hairpin brace reinforcement is welded from the tube to the top plate for added stability. Rubber cushioned, plated steel, self-leveling glides compensate for uneven floors. Top mount is available in chrome, or black enamel finish. (The insert is available in chrome only).

Fixed Height Legs: Your choice of 18 gauge tapered steel, round or square tubing welded to a triangular top plate. A hairpin brace reinforcement is welded from the tube to the top plate for added stability. The leg is equipped with rubber cushioned, plated steel self-leveling glides to compensate for uneven floors. The fixed heights range from 21" through 29". Available in all chrome, or black enamel finish.

Adjustable Pedestal Legs: Distinctively-styled, rugged steel legs adjust securely from 22"-30". Full-width stretcher bar adds stability to all size tables. Rubber cushioned, plated steel, self-leveling glides compensate for uneven floors. Upper section is black enamel; lower insert section has chrome-plated finish.

Book Boxes:

These rugged steel, black book boxes are available with one or two compartments to satisfy your specific needs.

Single Book Box size: 14"W x 12"D x 4 1/2"H

Double Book Box size: 25"W x 12"D x 4 1/2"H

Fruitable™ Series Juvenile Activity Tables

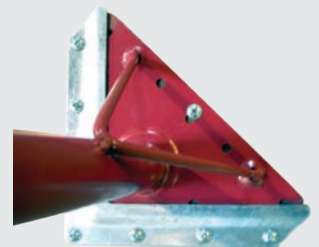

Fun, exciting shapes and colors for the early learning classroom

TOPS

Decorative high-pressure laminate surfaces in fun, bright Fruitable™ colors with matching safety T-mold edges and color coordinated upper legs. 45lb density, 1-1/8" thick particleboard, sealed with a laminate backer sheet for balanced construction.

LEGS

Tapered tubular steel, available in low range adjustable from 15" to 24.5" (suffix "L2200") or standard range, adjustable from 20.5" to 29.5" (suffix "L2000"). Both ranges come with color matching upper legs and chrome lower leg inserts.

Hardwood Stools™ STL Series
30" 24" 18"

Ideal, flexible stool seating for science labs, art rooms and classrooms.

Allied solid parawood stools are constructed of the most eco-friendly, sustainable hardwood used in furniture construction. Parawood is in the same family of hardwoods as maple, yet because it grows much more quickly, and farmers must be constantly planting new trees to replace those that are harvested, it is considered a renewable resource that helps the environment in many ways.

SEATS: Solid hardwood - 13-7/8" diameter, 3/4" thick, with smooth bull-nose edges for comfort

LEGS: Solid hardwood - 1-1/4" x 1-1/4" square, with smooth rounded corners for safety.

Horizontal Supports: Solid hardwood - 1-1/2" x 3/4", with smooth rounded corners

Footprint: 14" x 14" - providing exceptional strength, stability and safety

SIZES:

Model No.	Approx. Size	Color
STL18	18" Seat Height	Natural
STL24	24" Seat Height	Natural
STL30	30" Seat Height	Natural

K5 Planner Table

Distinctive, structurally superior solid steel framed utility tables

T5 Series Adjustable T-Leg Activity Tables

These tables have value and versatility you can easily adjust to!

TOPS: 47 lb. density, 1-1/8" thick particleboard, sealed with a laminate backer sheet for balanced construction. Long life high-pressure laminate surface. Available in Walnut, Teak, Light Oak, Fusion Maple, Grey Nebula, Blue, Red, Green, Yellow and White.

LEGS: Solid steel adjustable legs adjust in 1" increments from 22.75" to 30.75" for maximum flexibility. Dual-bolt machine screw locking device assures secure adjustment. Black enameled upper portion and chrome lower section gives a sleek modern, finer furniture look. Full length stretcher ties the legs together directly under the table top to add strength and prevent warping. Adjustable leveling glides allow for easy on-site leveling on any flooring.
