traffic related  
search

### MAT FINDER

Visit  
[crown-mats.com](http://crown-mats.com)  
The right mat is just  
clicks away!

### CATEGORY LIST

See page 63  
for quick search  
by type

### INDEX

See page 2  
for an A-Z list

## HOW TO USE THIS ENTRANCE MAT SELECTOR?

- 1 | Identify the type of area where you will install the carpet in relation to traffic  
(*ex: heavy traffic*)
- 2 | Refer to the corresponding collection of products (*ex: Performance Collection*)
- 3 | For best performance, combine a scraper, a wiper/scraper and a wiper from the  
same collection (*ex: Commercial Clean Machine<sup>®</sup>, Marathon<sup>™</sup> and Dust-Star<sup>™</sup>*)

**FOR BEST RESULTS,  
COMBINE THREE TYPES OF MATS  
IN THE FOLLOWING ORDER:**

### 1 | **SCRAPER**

- Exterior usage or between two doors
- Aggressive scraper surface, which will capture the majority of dirt from the soles of shoes
- Does not absorb moisture, which facilitates maintenance

### 2 | **WIPER/SCRAPER**

- Interior usage or between two doors
- Irregular surface which enables trapping the moderate dirt that was not captured at the scraper level.
- Moderately retains water and moisture that may later evaporate or be extracted at the right time.

### 3 | **WIPER**

- Interior usage
- Plays a major role in the retention of water and fine dust.
- Minimizes the risk of slipping and falling related to wet entrances and corridors.

persons per day!**

- Convenience store
- Restaurant
- Theater
- Museum
- Convention Center
- Hotel

### HEAVY TRAFFIC

**Over 1,500  
persons per day!**

- University
- Airport
- Hospital
- Large retail store
- Shopping mall
- School

## ENTRANCE MATTING: AN INTELLIGENT SOLUTION!

- Reduces maintenance costs
- Protects your floors
- Improves the air quality
- Enhances the look of your work place
- Diminishes the risk of slips and accidents

## INTERESTING FACTS

- Up to 80% of the soil is tracked in on the feet of people entering the building.
- Up to 24 pounds of dirt can be tracked in by just 1,000 people coming through an entrance over a 20-day work period.
- As much as 42% of the floor finish can be damaged or removed after 1,500 people have walked within the first six feet of an entrance without a matting system.
- 91% of people select a store for its appearance and 42% judge it primarily by the cleanliness of the floors.
- The cost to remove just one pound of dirt after it is tracked throughout a building exceeds \$500.
- Over 30% of worker injuries are slip-related and result in more than 300,000 disabling injuries each year.

*Extract from a Stephen Ashkin article, Destination Green, September 2006 / Progressive Shopper / Wausau Insurance Company*

## WHY USE ENTRANCE MATTING?

Entrance matting is the only preventive solution to minimize the accumulation of dirt in your building. As the first line of defense, remember that a proper arrangement of 15 linear feet of entrance matting will prevent up to 80% of the accumulated dirt from spreading onto your floors.

### WHAT IS

ThermoFlex™ technology gives you everything you expect from premium quality vinyl, and even more. Our company, with more than 68 years of expertise in the matting business, manufactures this special environmentally friendly formula!

**Now that you know, look for this symbol and insist on Crown's ThermoFlex™ superior durability backing!**

- **No mess!** Backing 100% impermeable to ensure optimal protection for your floors
- **No quality problem!** Perfect fiber adherence for a longer life
- **Less cracking!** Backing and borders are resistant to a wide range of temperatures and weather
- **Only premium vinyl!** With minimum fillers offers ease of handling and reduced transportation cost caused by excessive weight of second-quality vinyl

# THE CROWN DIFFERENCE

## PROUD TO BE A NORTH AMERICAN MANUFACTURER

We place our expertise at the service of customers around the world in order to develop solutions responding to their ergonomic and maintenance needs.

## A WIDER RANGE OF PRODUCTS

We offer the largest selection of entrance and ergonomic matting in the United States. You have a problem? We have the solution!

## TAILORED SOLUTIONS

We have the flexibility of meeting our customers' special requirements with factory finished products that meet the highest standards of quality.

## QUALITY AND INNOVATION

Our passion leads us to offer high-performance solutions that set new standards in the market.

## WE STAND BEHIND OUR PRODUCTS!

*In this period of economic challenges, companies must learn to do more with less. Leaders need to optimize their operations through smart investments to reduce their maintenance costs and ensure the health and safety of their employees and customers. It is in this value-added spirit that Crown offers its Performance, Prestige and Ergonomic Collections.*

***This is our promise to you:*** if these products do not reduce your maintenance costs or do not contribute to the well being of your employees, we will do everything in our power to give you satisfaction!

Cordially,

A handwritten signature in black ink that reads "Randy".

## NOSING

ACCESSORY

- Loose edging to be applied to ends of your mat
- Available in standard rolls of 3/4" X 100' or heavy-duty rolls of 1 1/2" X 50'

*Ask our customer service for more information*

#296

## TACK-TAPE™

ACCESSORY

- Specially designed double-sided tape for securing foam products and vinyl backed carpet mats to floors
- Roll dimensions are 4" X 250'

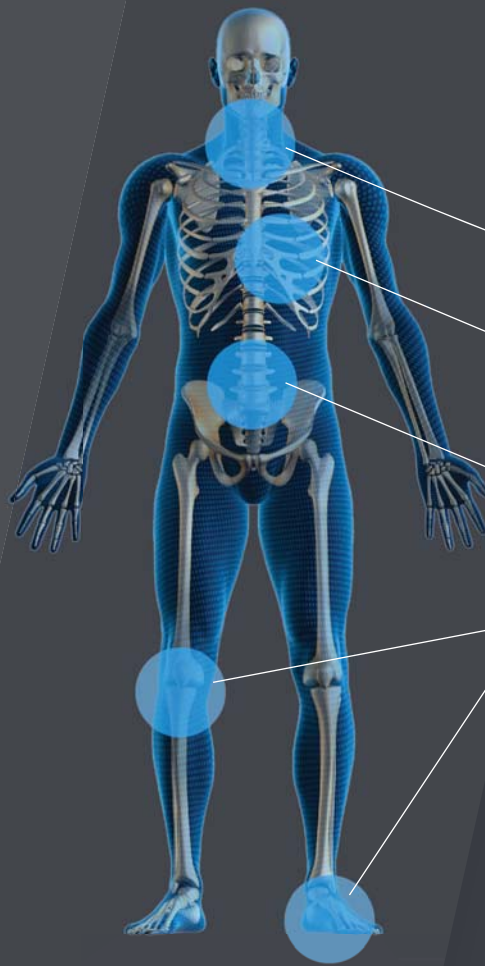

*Ask our customer service for more information*

## HOW DOES ANTI-FATIGUE WORK?

Anti-fatigue matting reduces fatigue for those who work in a standing position by providing a balance of “softness” and “support”. In addition, it offers a safe, non-slip surface that greatly reduces the risk of falls.

**Softness:** allows proper weight distribution while reducing the impact on the joints, allowing a more natural position and reducing stress on pressure points.

**Support:** provides resilience and bounce. As the worker’s foot presses into the mat, the matting pushes back against the foot enabling a flow of return energy to the worker and prevents blood from stagnating.

- Relieve tightened muscles
- Increase blood flow from compressed blood vessels
- Reduce stress on spine and back resulting from static movements
- Relieve stress on knee, foot and ankle joint pressure points resulting from long standing

*In our 68 years of expertise in the field of anti-fatigue mats, we have developed a technology exceeding the standards required for industrial workers. This technology is Zedlan™ - a substance so extraordinary and comfortable that we have patented it (patent # 5,965,650)*

### **Our Zedlan products offer incomparable advantages:**

- **More energy!** Zedlan™ sponge has three times the bounce of traditional anti-fatigue products
- **More durable!** Zedlan™ sponge outwears similar products by nearly three to one
- **Less slips and falls!** Zedlan™ sponge offers superior traction compared to regular foam products
- **Extreme flexibility!** Zedlan™ sponge will keep its anti-fatigue property, even under freezing temperatures
- **Natural anti-static!** Unlike other sponge products, Zedlan™ offers natural resistivity of  $10^9$  ohms per square

**NOW THAT YOU KNOW: INSIST ON ZEDLAN™ AND GET MORE BOUNCE FOR YOUR BUCK!**

# 4 WAYS TO FIND THE PROPER PRODUCT:

**SELECTOR**  
See below for  
traffic related  
search

**MAT FINDER**  
Visit  
[crown-mats.com](http://crown-mats.com)  
The right mat is just  
clicks away!

**CATEGORY LIST**  
See page 63  
for quick search  
by type

**INDEX**  
See page 2  
for an A-Z list

## HOW TO USE THIS ERGONOMIC MAT SELECTOR?

- 1 | Identify at the bottom of the chart the type of environment where the mat will be installed (ex: wet/oily areas)
- 2 | Identify the type of solution you require on the left of the grid (ex: max. comfort)
- 3 | Refer to the pages indicated at the intersection of the grid

### THE WORK ENVIRONMENT PLAYS A MAJOR ROLE IN CHOOSING THE RIGHT ERGONOMIC MAT. THIS CAN BE DIVIDED INTO THREE MAIN CATEGORIES

#### 1 | **DRY ENVIRONMENT** (SEE PG. 35)

For this type of environment, PVC foam mats are recommended, which provide excellent support against muscular fatigue while providing better adherence and insulation than that of cement and ceramic floors.

#### 2 | **WET ENVIRONMENT** (SEE PG. 47)

This area requires the use of matting with a drainage system to allow the fluid to evacuate and prevent the risk of falls. These are generally rubber compound mats that provide less support against fatigue yet have the advantage of adherence and durability.

#### 3 | **WET/OILY ENVIRONMENT** (SEE PG. 51)

These types of areas require very durable mats with an efficient drainage system. These mats should be made of quality materials such as nitrile, which is resistant to many greasy products. The mat must also have an aggressive pattern that will ensure good adherence on an oily surface.

# STANDING FOR LONG PERIODS CAUSES FATIGUE<sup>1</sup>

## Consequences of fatigue:

- Diminished worker **productivity**
- Increased risk of **accident**
- Reduced worker **motivation** and morale

## ERGONOMICS AS **THE SOLUTION...**

Ergonomics is the science of designing the workplace to maximize productivity by reducing fatigue and discomfort.

There is a significant correlation between the floor surface of a workplace and the fatigue of workers.<sup>2</sup> This situation can be easily rectified with proper ergonomic mats.

## THE LACK OF ERGONOMICS LEADS DIRECTLY TO **MUSCULOSKELETAL DISORDERS (MSDs)**

**Musculoskeletal disorder** is a condition that develops gradually as a result of repeated trauma.

## COST OF MUSCULOSKELETAL DISEASE IN THE **UNITED STATES:**

- \$510 billion in treatment cost per year <sup>3</sup>
- \$339 billion in lost wages <sup>3</sup>
- Accounts for 33% of lost-day workplace injuries and illnesses <sup>4</sup>
- Employed workers in the US miss nearly 440 million days of work because of musculoskeletal injuries <sup>5</sup>

<sup>1</sup> (Johansson, K., 1993, Advances in Industrial Ergonomics and Safety V. – Djupsjobacka, M., 1994 and 1995, Influences on [...] of arachidonic acid, Influences on [...] of bradykinin and 5HT)  
<sup>2</sup> (Redfern, M.S., 1987, University of Michigan)  
<sup>3</sup> The United States Bone and Joint Decade  
<sup>4</sup> United States Bureau of Labor Statistics  
<sup>5</sup> US Dept of Health and Human Services Center for Disease Control and Prevention National Center for Health Statistics

## THE SOLUTION

Ergonomic mats provide excellent support against muscular fatigue while also providing better slip resistance and improved insulation than that of cement and ceramic floors.

# DRY Environment

## MAT FOR 1001 USES

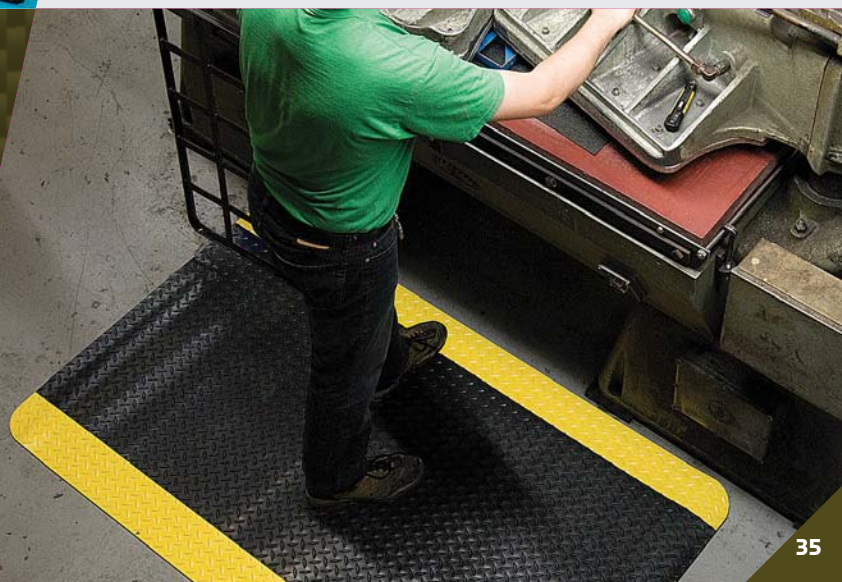

Crown mats are fabricated to provide comfort and safety in many work environments including assembly lines, work stations, packaging areas, cashier stations and behind pharmacy counters.

## UNCOMPROMISED WARRANTY

## THE SOLUTION

Matting with a drainage system enables liquid to evacuate thus reducing the risk of falls. These Crown mats are generally made of rubber compounds that promote slip resistance and durability.

# wet Environment

## MAT FOR 1001 USES

Crown mats are designed to enhance safety in many wet environments such as food processing, bars, dishwashing areas, recreational facilities and showers.

## UNCOMPROMISED WARRANTY

## THE SOLUTION

Crown industrial strength mats are made of grease-resistant material and have an efficient drainage system to ensure good traction.

# *Oily* Environment

## MAT FOR 1001 USES

Crown mats are designed to ensure safety and comfort in many environments such as machine shops, garages, oil changing pits, kitchens and cook lines.

## UNCOMPROMISED WARRANTY

Look for this logo in our Performance and Ergonomic Collections. It is our promise of unparalleled comfort, quality and durability.

## TOTAL CONFIDENCE WARRANTY

# TECHNICAL GLOSSARY

## Denier / Fiber

Denier is a unit of measure for the linear mass density of fibers. It is defined as the mass in grams per 9,000 meters. Fiber is a class of materials that are continuous filaments or are in discrete elongated pieces, similar to lengths of thread.

## Grit-Safe

A hard sharp granule material that provides extra traction.

## Heavy-Duty Needlepunch (HDNP)

Mechanical process involving thousands of needles that orient and interlock fibers to create non-woven fabric. Fabric is able or designed to withstand unusual strain.

## Microfiber

Microfiber refers to synthetic fibers that measure less than one denier. The most common types of microfibers are made from polyesters, polyamides (nylon), and/or a conjugation of polyester and polyamide. The shape, size and combinations of synthetic fibers are selected for specific characteristics, including: softness, durability, absorption, wicking abilities, water repellency, electrodynamics, and filtering capabilities.

## Nitrile

Added to rubber or plastic compositions, nitrile reduces the absorption of oils into standard rubber, which causes matting to swell and become slippery. For oily areas, use a mat blended with nitrile.

## Non-conductive

Non-conductive matting protects workers from electrical shock when operating high-voltage equipment. All of our switchboard matting has nonconductive properties.

## Nylon

A designation for a family of synthetic polymers known generically as polyamides. Nylon is one of the most commonly used polymers.

## P.E.T. Fibers

P.E.T. (polyethylene terephthalate) fibers are produced from recycled plastic bottles, nicknamed "pop bottle carpet". Naturally stain resistant and do not require the chemical treatments used on most nylon carpets. Retains color and resists fading due to sun or harsh cleaning. Color shades can be richer and brighter than those found in nylon yarns.

## Polyethylene

Created from a thermoplastic substance that is a synthetic polymer of propylene, this fiber is an excellent material for scraper matting due to its resiliency and hydrophobic properties (ability to repel water).

## Polypropylene / Olefin

Yarn extruded from polypropylene pellets into very fine filaments that are entangled to make mat yarn. Colors are added to melted polypropylene before extrusion. The most common yarn used in entrance matting.

## Post-Consumer

A waste type produced by the end consumer of a material stream; that is, where the waste-producing use did not involve the production of another product.

## Post-Industrial Waste

Materials collected that were generated as scrap or waste material of a production run. These materials are also referred to as pre-consumer.

## PVC

A thermoplastic material composed of polymers of vinyl chloride. PVC is a colorless solid with outstanding resistance to water, alcohols, and concentrated acids and alkalis.

## Resilience

A key factor in defining anti-fatigue matting. A mat's resilience, or "bounce", is what aids in the removal of lactic acid from the muscles, reducing fatigue. The higher the number, the more resilient the matting. A resilience of 25+ provides a significant increase in worker comfort.

## Resistivity

A measure of how strongly a material opposes the flow of electric current. A low resistivity indicates a material that readily allows the movement of electrical charge. The SI unit of electrical resistivity is the ohm meter.

## Solution-Dyed

A method of dyeing synthetic fiber in which pigment is added to the nylon or polypropylene chip before it is extruded as filament yarn.

## Tufted

Carpet manufactured by the insertion of tufts of yarn through a carpet backing fabric, creating a pile surface of cut and/or loop ends.

## Wear-Bond / Wear-Bonded

Our newest innovation in vinyl anti-fatigue matting. This proprietary process manufactures a durable, high-density top surface foam and a lower-density, softer base foam simultaneously. The result is a single, permanently bonded product with an excellent balance of wear and comfort.

Exclusive technology permanently bonds two surfaces without use of glues or adhesives

Customized to fit your design needs

The option to include your image on the mat

Manufacturing improvement resulting in more durable and heavy-duty product

Product contains recycled content and is designed to preserve our natural resources

# STANDARD LIMITED ONE-YEAR WARRANTY POLICY

Crown Mats & Matting warrants new products against defects in material and workmanship when maintained as instructed in the Crown Use and Care Product Information sheets included with each product. The obligation under this warranty is limited to the original user and to the replacement, repair, or pro-rated refund of said product. This warranty excludes the costs incurred for the installation of the carpet and/or mat. It remains the responsibility of the owner to carry out an inspection of the product prior to the installation.

## **THIS WARRANTY IS NOT APPLICABLE UNDER THE FOLLOWING CIRCUMSTANCES:**

- Improper use, application, installation or cleaning of the product
- Normal wear
- Use of this product for other than its intended purpose
- Lack of proper maintenance as described in the Crown Use and Care instructions packed with each product
- Products that have been altered in any way

If a problem with a product develops during the warranty period, contact your authorized Crown dealer.

## **TOTAL CONFIDENCE WARRANTY**

### **NO OTHER MATS WILL DO A BETTER JOB!**

Our Performance, Prestige and Ergonomic Collections were developed to provide you with the best matting solutions in the marketplace, to reduce your maintenance costs and to ensure the health and safety of your employees and customers.

### **For the life of the product, we promise to replace the product if:**

- you believe that the product is not performing as expected (ex: water retention, comfort)
- you feel the product is not safe (ex: tripping hazard)

*As long as the product is properly maintained and utilized. Does not cover normal wear. If you are not fully satisfied, contact your authorized Crown dealer.*

---

For more information on proper use and care of specific matting products, visit our website at [www.crown-mats.com/knowledgecenter/useandcare](http://www.crown-mats.com/knowledgecenter/useandcare)

# DID YOU KNOW?

The proper use of entrance mats is recognized by the United States Green Building Council, under LEED® certification system (Leadership in Energy and Environmental Design), visioning a transformed built environment leading to a sustainable future. Some Crown products can contribute in obtaining 2 credits:

1 Credit\*: “Utilize entryway systems (grates, mats) to reduce the amount of dirt, dust, pollen and other particles entering the building at all public entryways...”

1 Credit\*\*: “Purchases contain at least 10% post-consumer or 20% post-industrial material”

For more information, visit the website: [www.usgbc.org](http://www.usgbc.org)

\*EQ Credit 3.8 requirement, LEED for existing buildings April 2009

\*\*MR Credit 3 requirement, LEED for existing buildings April 2009

## KEEP IT GREEN!

### Disposal Concerns

One of the most important parts of the Green Building Program is concern for the environment, including the use of products that can help reduce the need for landfills. There are two key issues with mats:

#### 1. The composition of the mat

Many of our products have recycled content that prevents post-consumer or post-industrial products from entering landfills, thus preserving our natural resources.

#### 2. The performance life of the mat

High-performance mats can have a performance life of many years. Our Performance, Prestige and Ergonomic Collections (see pg. 3 & 33) have an extended Total Confidence Warranty that ensures a productive and effective life. To perform efficiently in a green building, sustainability is key. Inexpensive, low-performance mats will need to be replaced more frequently causing a disposal issue.
