KI offers furniture for the principal's office to the classroom and everywhere in between – and, you can find it all on ki.com. Simply browse by category, application, collection or product name.

PRODUCT INFORMATION

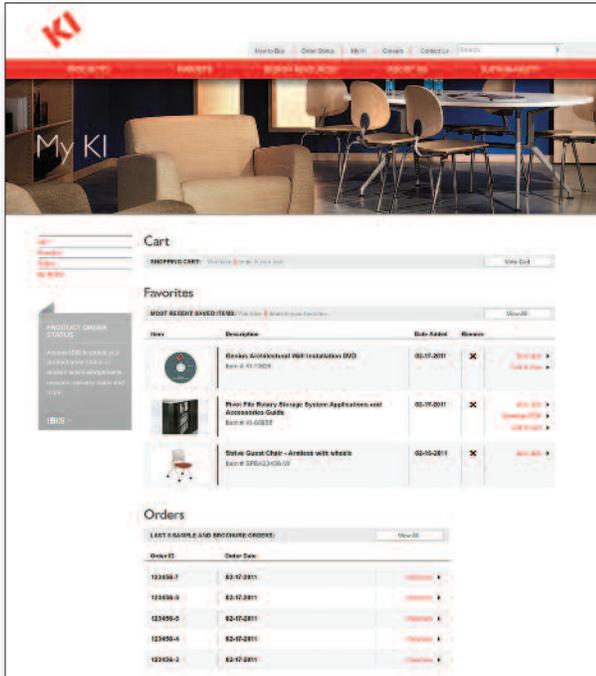

Each product page includes everything you'll need to specify within the click of a mouse – brochures, images, symbol libraries, fabric approvals, price lists and more – and all can be downloaded for use.

K-12 MARKET INFORMATION

Need information specifically about the education market? Then check out the Education Furniture page under the Markets section. There, you will find images, videos, white papers, articles and partner resources dedicated solely to Furnishing Knowledge about the Education market.

MY KI

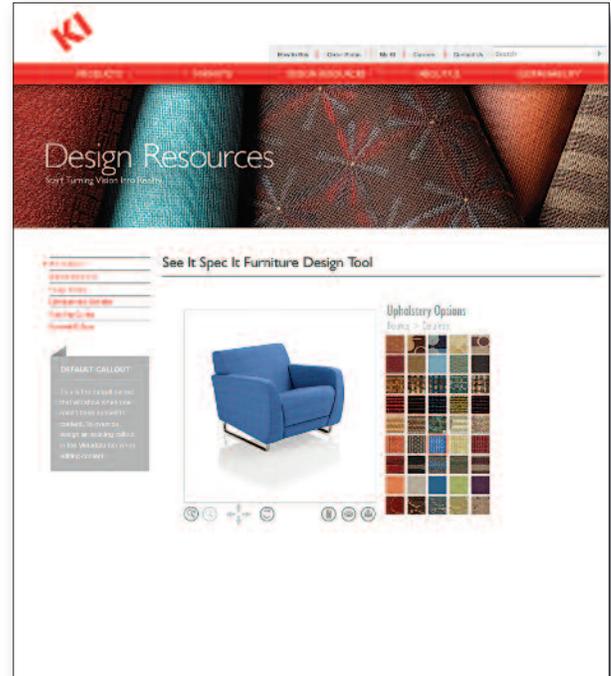

Like what you see? Then save it to My KI. Simply click on the My KI at the top of the page and set up your account. My KI allows you to do the following:

- Save your favorite web site pages, downloads, products and more
- Review items in your cart and place orders for literature
- Manage your communications from KI – list your preferences for receiving updates on new products, case studies, white papers, videos and more
- Access Order Status to view orders, shipments, acknowledgements, etc.

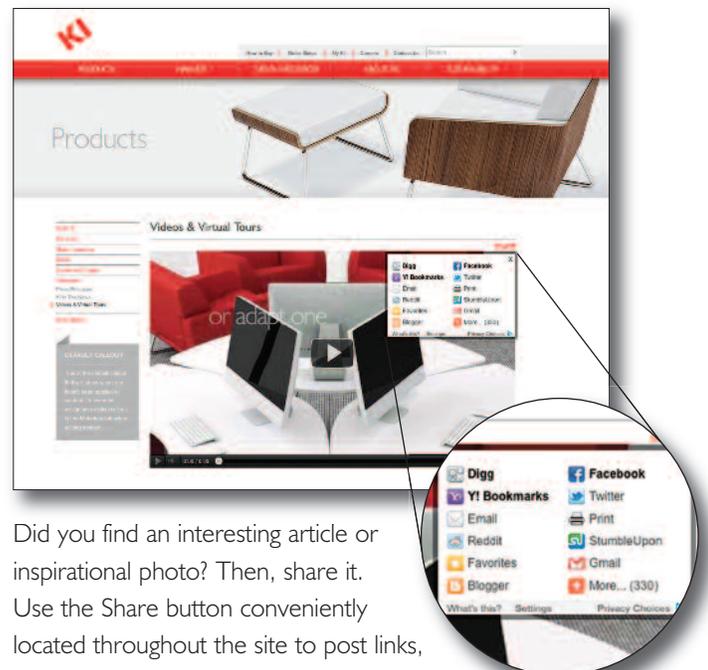

Virtually everything you need for K-12 educational furniture and design in one place.

SEE IT...SPEC IT

Inspire creativity with KI's super-fast swatching tool. A fantastic online resource, the swatching tool offers a zoom feature that shows detail to the level of fabric texture. View choices in real time on selected products. Save your creation to My KI, e-mail to a friend, download or print it.

SHARE IT

Did you find an interesting article or inspirational photo? Then, share it. Use the Share button conveniently located throughout the site to post links, images, downloads, etc. to the most popular social media sites and news outlets.

Creating High-Performance Learning Environments

K-12 classroom furniture is the foundational building block of a versatile learning environment. Seating must be comfortable, durable and flexible. Worksurfaces must be adequate to specific tasks—note-taking, laptop computer use, experiments, etc. Beyond these functional aspects, the classroom image portrayed correlates to student perception of your performance expectations. An attractive, highly functional, quality environment tells them you expect excellence.

Respected as a foremost expert in classroom furniture, KI can help you plan for and achieve optimal high-performance learning environments. Contact your KI Rep for planning assistance. KI makes educational furniture specifically designed for today's schools. You get the most comprehensive selection of educational furnishings available for planning your classrooms.

Need

Solution

Maximum student worksurface area	Tables and chairs
Flexibility for teaming and conventional use	Tables and chairs
Technology accommodation	PowerUp modules, Laptop Garage, Flatscreen Monitor Storage
Maximum seating capacity	Tablet arm chairs

Spatial Considerations

Instructor	50 - 100 sq. ft.
Tablet arm chairs	16 - 19 sq. ft. per student
Tables and chairs	22 - 32 sq. ft. per student
Theater-style seating	11 - 15 sq. ft. per student
Continuous table/chairs	17 - 22 sq. ft. per student

Example with Continuous Table/Chairs: 40 students = 900 sq. ft. room - 100 sq. ft. instructor space ÷ 20 sq. ft. per student

Student Seating Capacity = Total square footage of room minus 50-100 square feet of instructor space, divided by the square footage per student (depending on type of furniture to be used).

Recommended Chair and Desk Heights

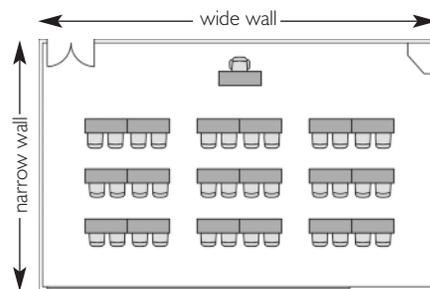

Chairs measured to top of seat	10"	12"	13"	14"	15"	16"	18"
Desks w/o book box		22"		24"	25"	27"	29-30"
Grade Level							
P							
K							
1							
2							
3							
4							
5-6							

Space & Capacity

Furniture must provide the right fit for the desired solution while maximizing space and inspiring engagement.

- Rooms with only one entrance/exit can, per fire code, accommodate a maximum of 49 students
- Rooms planned for 75 students or more usually benefit from Fixed Seating solutions (see AUDITORIUM/LECTURE HALL)
- Seating facing the narrow wall—creates optimal viewing for audio/visuals
- Seating facing the wide wall—provides maximum front-of-room instructional area—more intimate atmosphere

Recommendations for Seating Specification

Table depth	18" to 24"
Table width	32" to 36" per student 40" to 48" per student with a fixed desktop computer
Riser height	6" to 7"
Riser depth	50" to 57" (18" to 24" for table / 32" to 35" for chair)

Comfort

Comfort is critical to maintaining student focus and attention.

- Comfort is the key factor in better performance and productivity
- Comfortable spaces improve attention spans and academic performance
- Ergonomic design
 - Articulating chair backs for proper support
 - Open trunk/thigh angle for better comfort, better breathing, better attention
 - Rolled-edge seat fronts eliminate behind-the-knee pressure
- Improved tablet arm design
 - Oversized options provide larger worksurface
 - Plan for at least 10% left-handed tablet arms
- Wood-grain laminate surfaces add richness and warmth to space. Lighter-color laminates minimize eye fatigue.

Engage Students and Encourage Interaction

Classrooms should inspire formal, informal and team-based learning. Technology has had a huge impact on both K-12 faculty and students. Technology enhances learning, empowers both faculty and students, and expands connectivity. This puts new demands on learning space, media, and lighting. Laptop

computers have revolutionized learning with student response systems, WiFi and other emerging technologies. This has increased the demand for small, WiFi enabled alcoves, break-out spaces and cyber cafés.

Dorsal® Classroom Collection

For the most current pricing and information please visit Kleducation.com

Dorsal classroom single-unit solutions create comfortable, durable, and effective learning environments. The back rest flexes to adapt to the user in relaxed and upright positions, which maximizes student comfort. Sturdy steel frames minimize maintenance and last for years. And, the single-unit approach typically costs less than separate chairs and desks.

- Available in poly. upholstered seat, or upholstered seat/back
- 1090 available in three different tablet sizes - standard, oversized, or laptop.
- 1090 standard and oversized tablets can be fixed or flip up
- Student desk, 1090 and round leg tablet arm chair offer optional book racks

Adapting to Future Needs With Innovative Technological Learning Environments

Technology is everywhere. Laptop computers, iPods, PDAs, smart phones—all enhance our lives yet create special challenges and concerns in educational environments. With proper planning and furnishings, technology will enhance and accelerate learning.

Use collective technological know-how to make your computer classroom or lab the best fit for your students and faculty. KI can help you plan your computer classroom or lab to accommodate equipment, facilitate various uses, enhance accessibility and adapt to changes in the future.

K-12 facilities typically need to provide for technology/power access in resource centers, computer labs and computer classrooms.

Need

Solution

Collaboration	Tables, chairs, PowerUp modules, wire management
Interaction	Tables, chairs, PowerUp modules, wire management, rows of powered tables with swivel seating
Instruction	Powered tables, wire management, PowerUp modules, Laptop Garage, Flat Screen Garage
Study	Individual or grouped powered tables and carrels with dividers and modesty panels for privacy and concentration
Recreation	Lounge seating with tablet arms for laptop computer support (see LOUNGE)

Area & Capacity

It is important to provide adequate workspace space for laptops, notebooks, papers, monitors, and CPUs (if not placed on a bracket below the workspace). Keyboard drawers house the keyboard at a comfortable level and also provide dust protection when closed.

Consider whether the space will be used for instructor-based activities or individual-based activities. Consider what type of hardware will need to be accommodated (traditional or flatscreen monitor, or laptop computers and other mobile technology). Consider the infeed locations provided in the room (floor fed or wall fed). Also consider the level of visual privacy

needed in each application. Dividers between workspaces are recommended for individual-based activities (computer lab, study and research). They are not generally used in rooms catering to instructor-based activities. Consider the length of time a typical user will spend at the workstation, the amount of supervision the space receives, as well as cleaning and maintenance requirements.

Sometimes spaces need to adapt to multiple uses. Convert interactive classrooms into high-tech computer classrooms with the simple touch of a button. Storage systems for laptop computers and flatscreen monitors maximize workspace space and improve equipment security. Instructors can lock down entire classrooms of laptops or flatscreens (with keyboards) with keyless remotes ... a KI exclusive.

Spatial Considerations

Workspace Depth	24" to 30" (24" is adequate for flatscreen monitors. 30" is recommended for traditional monitors.)
Workspace Width	36" to 48" (1 user) 60" to 72" (2 user)
Workspace Height	29" to 30"
Workspace Stand-Up Height	38"
Adjustable Workspace Height	24" to 41"
Wheelchair Access /ADA height	32"

Power and Data

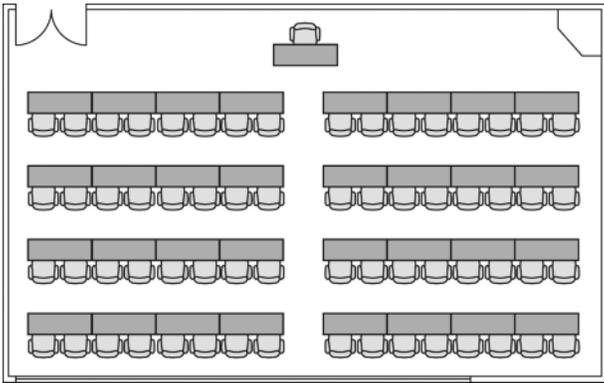

Computers require numerous cables for power and data support (either floor fed or wall fed). Effective cable management eliminates clutter, improves an area's appearance, reduces the risk of accidental disconnects and provides protection from cross-talk interference on power and data lines.

Utilizing rear beam power capabilities in back-to-back powered table arrangements significantly reduces the number of power components needed and results in an overall cost savings. Advanced capabilities of powered table systems reduce the cost of the infrastructure required in an area by reducing the need for conduit and multiple drops.

Talk with your administrators and K-12 instructors to gain their input on room layout and design. Different configurations may be needed to accommodate varied teaching styles. The room configurations featured here are solid solutions to providing adequate space for technological uses while providing optimal capacity.

Straight Row

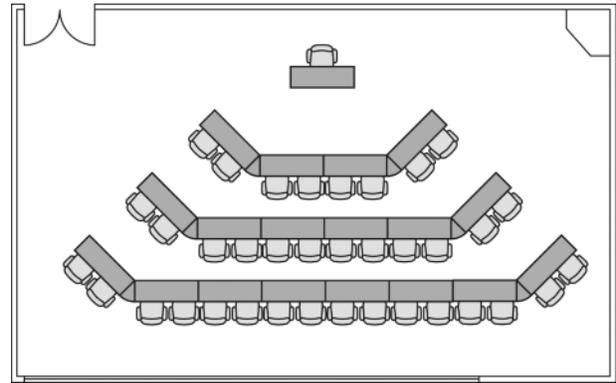

Optimal capacity. Can be disturbing due to the need to pass behind other students to reach center workspaces.

Computer labs benefit from privacy dividers and smaller groupings to lessen distractions. See the Back-to-Back and Pinwheel configurations. Computer classrooms need to utilize space strategically and foster collaboration and interaction. See the Wedge and Straight Row configurations.

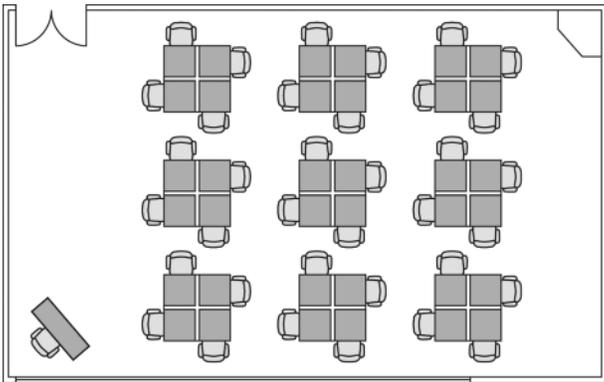

Wedge

Improved sightlines (over straight row). Innovative, contemporary appearance.

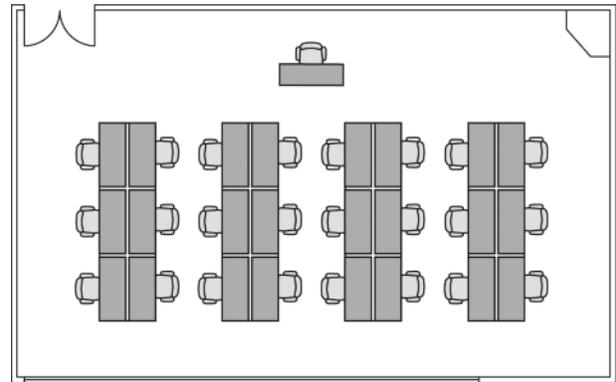

Pinwheel

Interesting in appearance. Tends to be quieter. Ideal for smaller number of students. Dividers improve privacy and concentration.

Back-to-Back

Efficient. Reduces number of power components needed. Lowers costs. Dividers improve privacy and concentration.

InTandem[®] Table System

For the most current pricing and information please visit Kleducation.com

A powerful alternative. Impressive wire management. Compelling appearance. Flexible configurations. Back-to-back. Side-to-side. Any way you want it. The InTandem table system is the easiest way to access power and data.

- 8-wire, hard wire or non-powered beams
- Unique internal beams hold separated wires and cables
- Beam has flip-down doors with convenient access from front or back
- Three table depths, nine table lengths, three leg heights
- Three privacy screen/divider heights

Smart Lift™ Table

For the most current pricing and information please visit Kleducation.com

KI's Smart Lift table is an intuitive and secure response to managing flat screen monitors within learning or teaming environments. With a simple push, Smart Lift transforms from a flat, multipurpose table surface to an interactive multimedia tool. Quiet and easy to engage within seconds, Smart Lift's manual garage stows flat screen monitors securely below the table surface. Expensive computer equipment can be stored and locked when not in use, allowing the flat table surface to be used for a variety of purposes.

- Single units - 36", 42", 38" and 54" wide
- Double units - 60", 66", and 72" wide
- Three edge styles: PVC, elliptical molded urethane, and post-formed laminate
- Optional PowerUp modules
- Optional electric or manual lock

Flat Screen Support System

The flat screen support system offers a sleek design and building block versatility to ergonomically configure one, two, three, or four screens. Raise it. Lower it. The arm supports the monitor off the desktop to free up space underneath. Swivel it. Tilt it. Rotate the monitor from landscape to portrait to accommodate full-page viewing software.

- Post or clamp mounts and grommet base available.
- Monitors can also mount back-to-back.

Flatscreen Garage®

Flat Screen Garage transforms a flat worksurface into a computing center at the touch of a button. In the up position, each monitor, keyboard, and mouse are lifted to worksurface height.

- Electronic controls mounted under the worksurface
- Student-operated up/down switch
- Automatic open lock for safety
- Optional keyless remote locks down an entire classroom of monitors for security

Lancaster Auditorium Seating

Auditoriums and lecture halls reflect a school's image. KI has the expertise to help you develop creative, innovative auditorium and lecture hall solutions that showcase your school.

KI auditorium and lecture hall seating harmonizes with visual technology and high-quality acoustics to create outstanding facilities. Contact your KI Rep with floor plans, specifications and budget parameters for specialized planning. Use our expertise to assist you in room configuration, selecting seating styles, finishes and fabrics.

THEATER-STYLE AUDITORIUM SEATING

Need

Solution

Performance space with audience seating—upscale look and acoustical performance	Wood backs, armcaps and end panels. Comfortable, plushly cushioned seats. Acoustical seat pans, row markers and aisle lights
Combined-use space—performance and instruction with optimal seating capacity and sightlines	Poly backs for extra durability. Oversized tablet arms to accommodate laptop use and note taking. Power access for interactive learning. Multiple seat spacing options

ADA Requirements

- Clear space of 30" x 48" (wheelchair station)
- Knee and toe clearance (27" high, 30" wide and 17" deep)
- Height of worksurface (28" to 34")

ADA swing arms and removable units are available for both Concerto and Lancaster seating.

2010 ADA Standards for Accessible Design

Table 221.2.1.1

Number of Wheelchair Spaces in Assembly Areas

Number of Seats	Minimum Number of Required Wheelchair Spaces
4 to 25	1
26 to 50	2
51 to 150	4
301 to 500	6
501 to 5000	6, plus 1 for each 150, or fraction thereof, between 501 through 5000
5001 and over	36, plus 1 for each 200, or fraction thereof, over 5000

Spatial Considerations

Row-to-Row Spacing

Minimum spacings are derived from the edge of the back to the edge of the back of the seat in front of it. All tablets are a single-motion mechanism and stow during egress.

Contact KI for CAD drawings and seating layouts.

Recommended Riser Dimensions

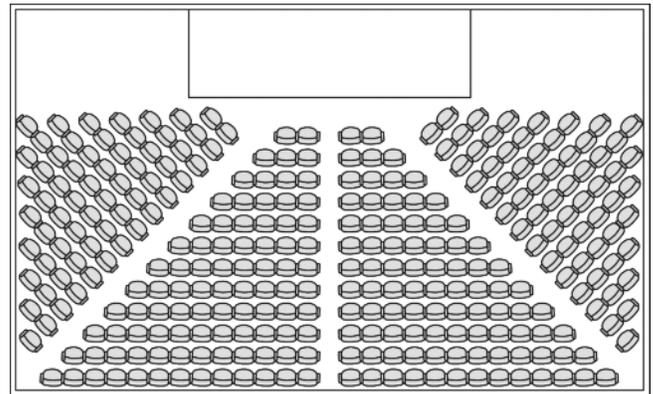

Riser Height: 6" to 19"

Riser Depth: Minimum Row-to-Row Spacing plus any additional clearance

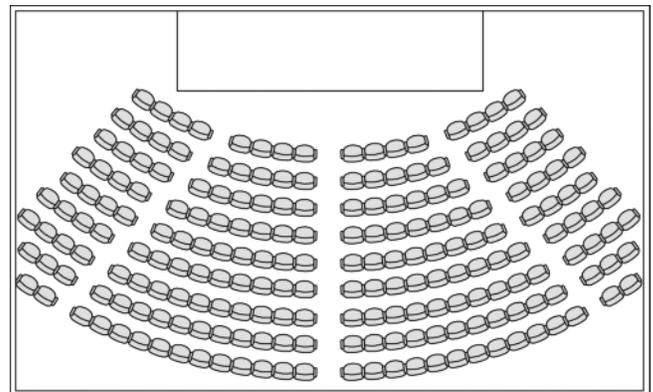

Seat Options

	Concerto	Lancaster
Seat Widths	6 widths 19" to 24"	4 widths 20", 22", 23", 24"
Pitch	16°, 20°, 24°	16°, 19°, 22°

Auditorium Configurations

Angled Row

Fan

Power Access

KI leads the way in the creation of auditorium seating with power and data modules. Power and Data modules are available on both Concerto and Lancaster seating.

FIXED SEATING WITH TABLET ARMS

(Not featured—see kieducation.com)

Need

Solution

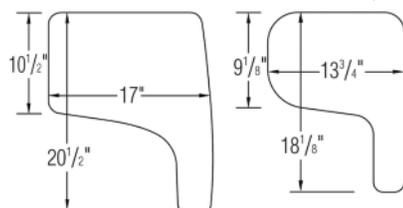

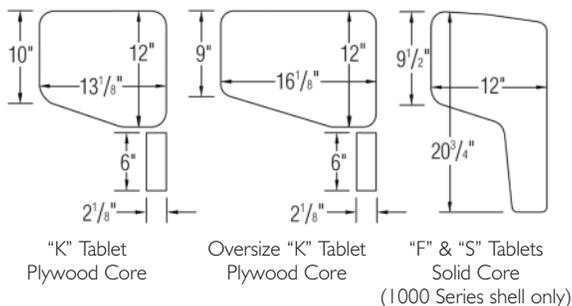

Laptop use and interactive learning	Beam-mounted Sequence seating with power and data option
Laptop use and note taking	Either beam-mounted Sequence or Single Pedestal seating with oversized (K) tablet arm
Curved room configuration	Curved beam-mounted sequence seating
Maximum seating capacity or narrow risers	Sequence HD seating

Spatial Considerations

Contact KI for CAD drawings and seating layouts.

Collaborative Fixed Seating

Achieve collaborative learning spaces with rotating seats that enable students to form break-out groups and teams quickly and efficiently. 360 degree rotation is standard on Jury Base seating and available as an option for Single Pedestal tablet seating and University seating. Stationary bases and automatic seat memory return keep rooms looking uncluttered. Double riser depth is recommended for optimal collaboration.

Recommended Riser Dimensions

Riser Height - 6" to 12"

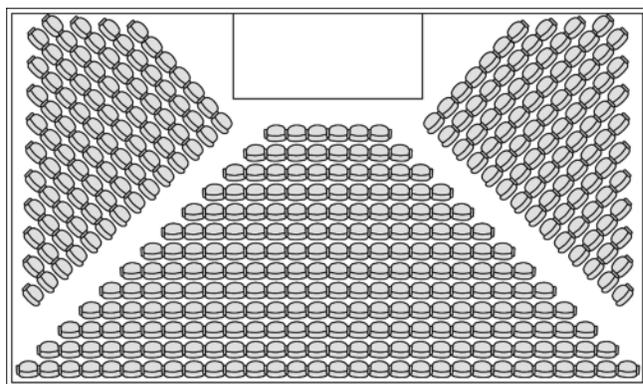

Riser Depth - Minimum Row-to-Row Spacing plus any additional clearance

ADA Requirements

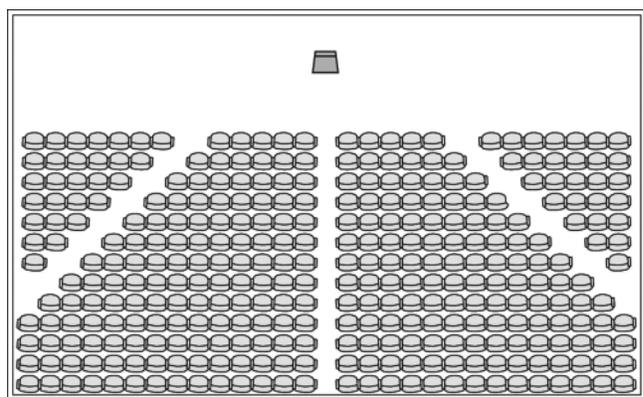

- Clear space of 30" x 48" (wheelchair station)
- Knee and toe clearance (27" high, 30" wide and 17" deep)
- Height of worksurface (28" to 34")

Refer to ADA Standards Table 221.2.1.1 (see page 55)

Fixed-Seating Configurations

Angled Row

Straight Row

Power Access

Sequence and Sequence HD seating are available with an optional Power and Data module. Shared modules are located between seats. Each module has two power receptacles and two data ports.

FIXED WORKSURFACES WITH SEATING

Need

Solution

Laptop use and interactive learning	University seating or Seminar tables (loose or fixed seating) with power and data access
Laptop use and note taking	University seating or Seminar tables (loose or fixed seating) with power and data access
Upscale look—high degree of comfort	Engage, Impress, Impress Ultra, Piretti 2000 Task, Torsion, or Torsion Air shells on University seating or as Jury Base seating
Curved or wrap-around room configuration	Curved or truncated University seating or Seminar tables

Spatial Considerations

Contact KI for CAD drawings and seating layouts.

Recommended Riser Dimensions

Riser Height: 6" to 12"

Riser Depth: Minimum Row-to-Row Spacing plus any additional clearance

Seat Options

University seating has 10 shell options and measures 54" to 60" base to base. Jury Base seating has 9 shell options to meet any comfort, image or budgetary needs. Seat widths vary by shell style.

University™ Seating

For more information please visit Kleducation.com

Enhance the appearance and functionality of any lecture hall. University Seating is an integral part of any interactive learning environment. It accommodates a wide variety of individuals with floor-mounted bases and swing-away seating that automatically returns to the forward position for a neat appearance. Large worksurfaces provide more space for writing or computing than tablet arm seating. Entire system is UL approved when power is used.

- Straight or curved worksurfaces
- Flat or sloped floor mount
- Basic or Select bases
- PowerUp modules or undersurface power and data access
- Swivel seats (optional 360)
- Optional adjustable-height seats
- Multiple seating and edge styles
- Optional modesty panels

Seminar™ Table

Seminar tables incorporate fixed tables in conjunction with move-able seating or fixed Jury Base seating to meet a wide range of space requirements. Custom sizes, shapes, and finishes are available. Entire system is UL approved when power is used.

- Straight or curved worksurfaces
- Flat or sloped floor mount with Basic or Select bases
- PowerUp modules or undersurface power and data access
- Multiple edge styles and optional modesty panels

Non-Continuous Seminar™ Table

Non-continuous worksurfaces are available on Seminar tables. Space is segmented by each work surface's section and seating must be spaced to work within each segment. Non-continuous worksurfaces are not dependent on the radius of the room, have shorter lead times and lower cost.

- Straight or curved worksurfaces
- Flat or sloped floor mount with Basic or Select bases
- PowerUp modules or undersurface power and data access
- Multiple edge styles and optional modesty panels

Uniframe Tables
Without Seating and
Maestro Chairs

Cafés and cafeterias in K-12 schools must meet a variety of applications and a wide range of functions. From food service/cafeteria to auditorium/gathering places, these spaces must be flexible, easy to use, and easy to transition.

KI provides solutions that offer the need flexibility. Some factors to consider during planning are: available square footage, capacity, ambiance and theme, customer turnover rate, plus WiFi and power access. Contact your KI Rep for dining solutions that are efficient, durable and beautiful.

Need

Solution

High style	Contemporary style chairs, café stools, and tables
Upscale ambiance/intimate setting	Tables with wood veneer tops or edges and upholstered or partially upholstered chairs. Primarily round or square tables (some rectangular for larger groups) with ample seating space
High density/high turnover	For easy cleaning and fast set up, use Uniframe tables, stacking poly chairs, and/or lightweight folding or flip-top tables. To condense seating, use rectangular tables.
WiFi and power or standard data access	Tables with power access (PowerUp modules) and ample worksurface space

Fabric Treatments

- Crypton: resists stains, moisture and bacteria
- GORE: resists moisture and contamination, maintains breathability
- Moisture barrier: second waterproof layer sewn between fabric and foam
- Flammability
 - CA117 (meet or exceed standards)
 - CA133 (tested flammability standards)

General Dining Seating Capacities

(based on average chair width of 20" with 5" between chairs)

Square Tables

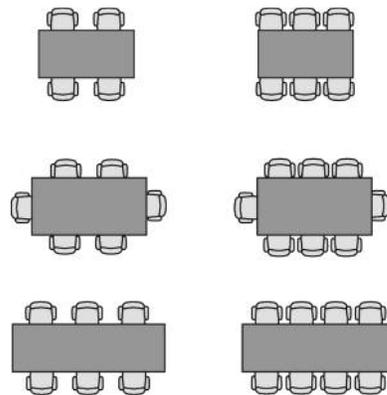

30" x 30" Seats 4
36" x 36" Seats 4

Rectangular Tables

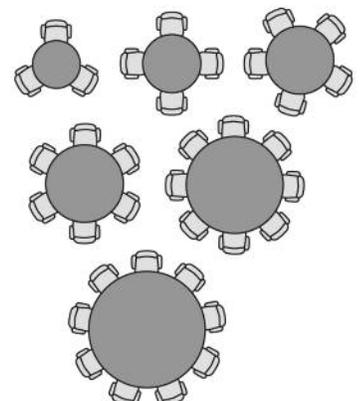

30" x 60" Seats 4 (cafe) or 6* (high capacity)
30" x 72" Seats 4 (cafe) or 6 (high capacity)
36" x 60" Seats 4-6* (cafe) or 6* (high capacity)
36" x 72" Seats 4-6* (cafe) or 8* (high capacity)
30" x 96" Seats 6 (cafe) or 8 (high capacity)

*with chair placed at each end of table

True Desking, Balance Overheads, Engage Chair, Torsion Stack Chair

Imagine efficient workspaces that are flexible and durable. Convenient filing for all kinds of documents and media. Conference spaces that facilitate and accommodate meetings. Furniture that works with today's and tomorrow's technology. Ergonomic comfort. Complete design continuity. If you can imagine it, KI can make it a reality.

Team with KI to design a better approach to administrative offices and conference rooms. KI can help survey school associates on their space utilization needs and recommend solutions that create efficient, productive office environments.

Considerations include space utilization, technology needs, work flow, noise reduction, lighting, flexibility for reconfiguration, and privacy.

Need	Solution
Reconfigurability	Mobile furniture and easy to reconfigure systems
Flexibility	Mobile furniture and height adjustability
Efficiency	Adaptable filing systems, and easily accessible overhead storage
Comfort	Adjustable, ergonomic seating, and height adjustable worksurfaces
Privacy	Panel systems, privacy panels on desk systems
Teamwork	Shared workstations and mobile furniture
Reception	Upscale look, accessibility, transaction countertops and concealed wire management
Conference	Ganging tables, veneer tops/ edges, power access

Ergonomic Seating

Accomplishing work effectively requires a total system that integrates the user into the workspace. Seating is the critical link between the user and the task to be accomplished.

Chairs need to be designed to accommodate physical changes in users, advances in the tools used and the tasks performed.

User Trends

- Aging: Increased sensitivity to pressure points.
- Obesity: Chair fit is an issue. Need wider seats, deeper seat adjustments and different backs for improved lumbar support.

Adverse Effects of Evolving Tasks

- Technology: more and varying technology consumes more valuable work space.
- Sedentary positioning due to longer sitting periods results in fatigue.

Ergonomic Seating Goals

- Increase Stability: provide natural support for the many parts of the body in various positions.
- Minimize muscle tension: ongoing muscle activity to maintain posture causes fatigue. Relaxed posture sustains energy.
- Promote movement: it is healthy and natural for the body to move, maintaining circulation.

Darwin® Collection

Apply Darwin's warm elegance in executive suites, u-shaped workstations, gallery desks, complete wall units or multipurpose areas.

- Modular, non-handed pedestals
- Fully veneered drawer and cabinet interiors
- Crown molding on overheads
- Fully finished tops, sides and backs of all cases
- Six edge choices and five wood finishes

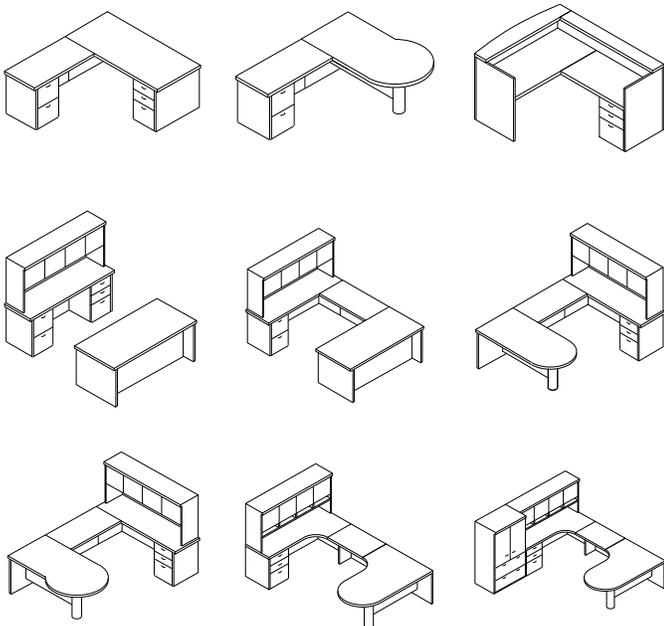

Delsanti® Collection

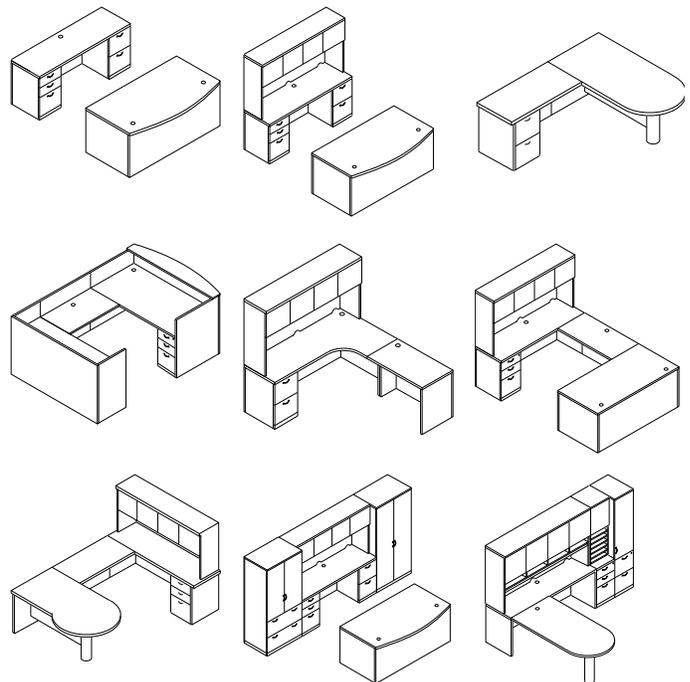

Delsanti offers an incredibly large number of versatile components that offer durability, quality, and value.

- Extensive choice of components, shapes and sizes
- Total modularity, hundreds of office solutions
- Fully veneered drawer and cabinet interiors
- Fully finished tops, sides and backs of all cases
- Five wood finishes

Grand Salon Lounge Seating, Rado Tables

Create inviting havens for students, faculty and visitors. Places to relax. Dynamic hubs. Impressive, welcoming entries. Plan your informal space furniture to suit an array of needs.

Consider space usage, traffic flow, image concerns and durability then plan to maximize the appeal of these areas. KI will help with distinctive designs, comfort, unmatched durability and innovative technology. Contact your KI Rep for assistance.

Need

Solution

Flexibility and comfort	Lounge seating with freestanding occasional tables
Study and social areas	Tablet arm lounge chairs, ottomans, power access nearby for laptop support
Collaborative, break out areas	Mobile seating and tables or castered tablet arm lounge chairs
Informal short term seating	Benches and oversized ottomans
Optimal space usage and orderly appearance	Multiple seating—smaller scale, ganging, tend to stay in place

Upholstery

The type of fabric selected will have a major impact on the wearability and longevity of your lounge seating.

- Upholstery options
 - KI upholstery fabrics, vinyls, faux leathers and leathers
 - Pallas upholstery fabrics
 - C.O.M fabrics (customer's own material)
 - K.O.M. fabrics (specified by customer but ordered by KI)
- Fabric treatments
 - Crypton: resists stains, moisture and bacteria
 - GORE: resists moisture and contamination, maintains breathability
 - Moisture barrier: second waterproof layer sewn between fabric and foam
 - Flammability
 - CAI 17 (meet or exceed standards)
 - CAI 33 (tested flammability standards)
- Contrasting fabrics available

Lyra[®] Lounge Collection

Staff Work Space

Based on workstations (tasks and service points), not number of employees.

125 to 150 sq. ft./workstation

Power and Data Access

As the use of electronic technology continues to grow, power access becomes increasingly important. Even with increased use of WiFi, laptop users must rely on power access to conserve battery power. Tables, carrels, and circulation desks are available with PowerUp modules. With KI's Connect plug-and-play power system, up to six modules can use the same power source without hardwiring.

CrossRoads[®] Library Furniture

For the most current pricing and information please visit
Kleducation.com

Timeless CrossRoads furniture blends into any setting with an inviting transitional design and clean, understated details. It integrates aesthetics, technology and craftsmanship. Plus, it's versatile enough to handle any demand. For now, for the future, durable CrossRoads withstands the test of time. Available in ten wood finishes.

- Curved or straight styles in ten wood finishes
- Customizable circulation desk
- Carrels in two heights and tables in three heights
- Panel leg or rectangular, square and round 4-leg tables
- PowerUp modules or grommets

ValueLite® Table

For the most current pricing and information please visit Kleducation.com

For spaces where tables are sometimes needed (and sometimes not), versatile ValueLite folding tables let you respond to shifting needs. With all the features you want and the ease of handling you need, ValueLite tables make set up and tear down a breeze for school events, meetings, and more. They have a durable, lightweight, blowmolded construction with impact-resistant corners. UV inhibitors make them perfect for indoor and outdoor use. Legs fold within the frame for easy stacking.

- Rectangular, round, and picnic
- 6 sizes - fixed height
- Rectangular and round have Speckled White tops with Black frames
- Picnic tables have Putty tops with Bronze frames

Premier[®]/Heritage[™] Folding Tables

For the most current pricing and information please visit
Kleducation.com

Get durability, strength, high quality and superior performance with Premier and Heritage folding tables. Premier tables are the prudent choice for heavy-duty applications requiring frequent use and set up. Heritage tables are a modestly priced alternative for situations that require heavy-duty tables that are not subject to repeated folding and handling.

- Premier tables available in honeycomb-top fixed- or adjustable-height rectangular tables; or solid-core-top round tables or benches
- Heritage tables available in solid-core-top fixed- or adjustable-height rectangular tables
- High-pressure laminate top (both table styles)
- Bullnose edge (both table styles)
- Vertical or horizontal storage caddies
